

Vector Frame Dynamic Light Box Rectangle 03

VF-DYCL-LB-R-03

Vector Frame™ Dynamic Light Boxes feature 100mm (4") aluminum extrusion frames, a single-sided Intensity push-fit backlit fabric graphic and animated, programmed LED lighting. The light pattern and timing is customized to bring the display to life. Stock animations are also an option.

features and benefits:

- 100mm (4") silver extrusion frame
- Programmed, animated LED light curtains run the height of the frame
- Single-sided backlit Intensity push-fit fabric graphic with opaque liner
- Easy assembly
- Custom or standard animation options available
- Comes packaged with one OCE wheeled molded case for transport and storage
- Lifetime frame warranty against manufacturer defects
- 90 day light warranty

Included In Your Kit

Frame Assembly

Step 1

Slide the LN100-2 into the WMFC4 Outer channel then attach the SW-FOOT-500-LN to it via the thumb screws. Repeat for both sides.

1

Frame Assembly

Step 2

Slot the IB2 into both sides of the WMFC-4-1200 and tighten. Repeat for both sides.

2

Frame Assembly

Step 3 and 4

3 Thread each of the LED-DYCL-IBOLTS through a SLIDE-NUT-NEWS. Slide the connected pieces through the middle channel of both MCB9-MCB9s. The spacing can be adjusted when the curtains are attached.

4 Slot the CB9 into both the WMFC4-1200 and WMFC4-760 then tighten. Repeat for both sides and top and bottom.

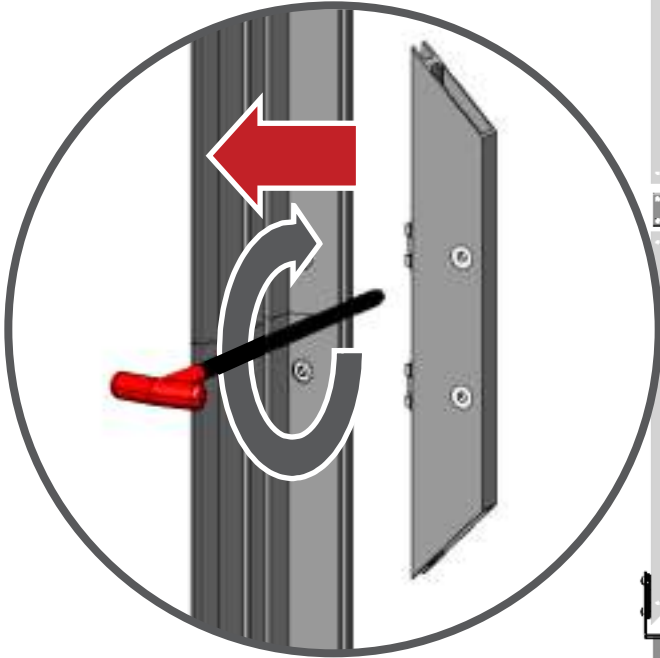

Frame Assembly

Step 5

Attach the AF16 to both WMFC4-1200s. Repeat for both sides.

5

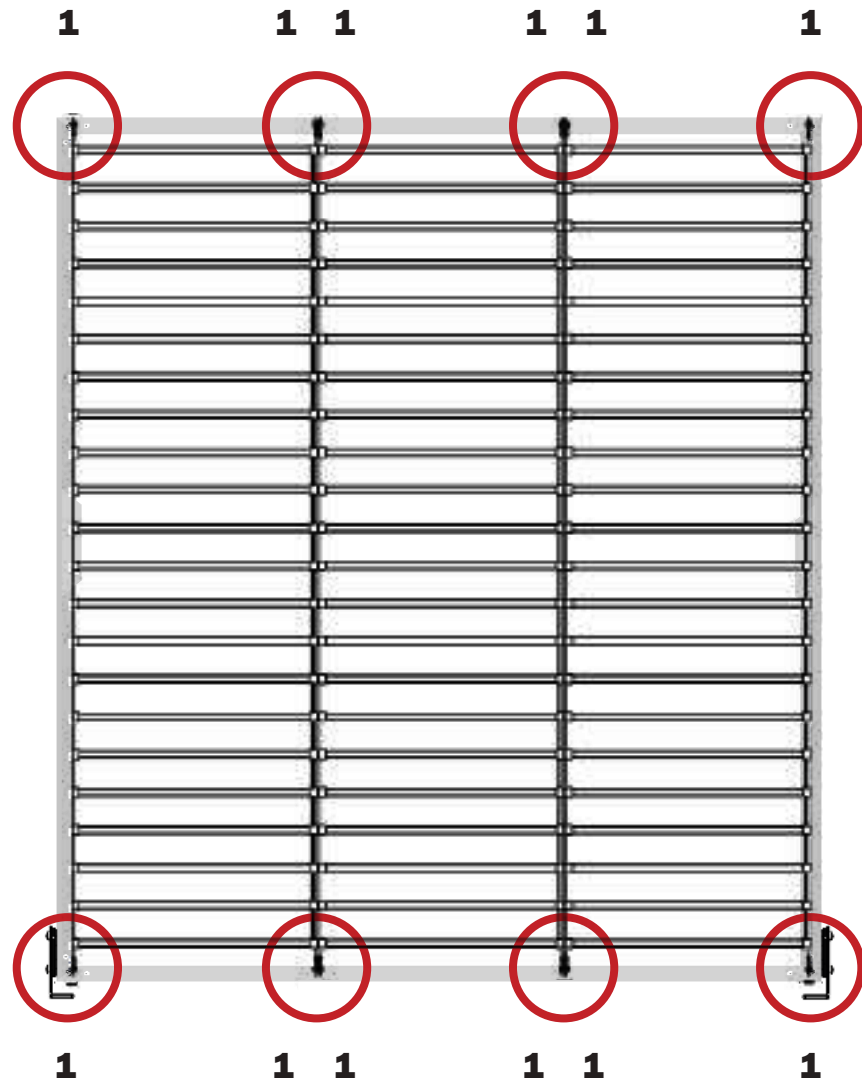

Light Curtain Attachment

Unfurl the preassembled light curtain and hang from the LED-DYCL-IBOLTs, ensuring the “UP” label is at the top of the frame, and the “DOWN” label is at the bottom.

1

See next page for in-depth guide on how to adjust the curtain hooks, especially to reduce slack at the bottom of the frame.

Adjusting Light Curtain Tension

Step 1
Locate the curtain light hook button.

Step 2
Press down on the button releasing pressure from the curtain light cable.

Step 3
While pressing down on the button pull the cable away from the curtain light to tighten or release tension.

Light Connection

Connect the light curtains together with the LED-DYCL-CABLES;

From the back of the frame, start at the top-right corner of the left-most curtain and connect the LED-DYCL-CABLE to the bottom-right corner of the next adjacent curtain, as shown to the right.

Then repeat, starting at the top-right of the newly bottom-connected curtain, for all remaining curtains.

Front View

Power Connection

Connect the light curtains to the transformers for power;

From the back of the frame, plug in the black plug of the light curtains to the transformer plugs.

Connect the controller to a transformer for power (see image on the right);

From the back of the frame, plug in the black plug of the controller to the transformer plugs.

Set transformer to appropriate voltage:

US: 115v

International: 230v

Back View

Front View

Important: the controller must be connected to the right-most light curtain from the front (left-most from the back) for the animation to operate correctly.

Back Liner Attachment

Fit backer into corners,
then "tap" into rest
of frame channel.

"Sliding down" backer
is not recommended
for best installation.
